The Nugget Is California's Leading Mining Weekly

Nevada City Nugget

VOLUME V, NUMBER 46 THE GOLD CENTER THE NEVADA CITY NUGGET, CALIFORNIA THE COUNTY SEAT PAPER FRIDAY, NOV. 27, 1931

Well-known Writer of Mining Articles Visits Nevada City

Letson Balliet, well known writer of articles on mining and finance, made a brief visit to Nevada City on Monday and called at the Nugget office to make the acquaintance of the editor. He found there the Bessler brothers, Tom and Bill, who had been employed by him in the mechanical department of the Eevning Herald at Baker City, Oregon, 30 years ago.

Mr. Balliet was enroute to his home in Tonopah, Nevada, from a trip to Los Angeles.

In an interview with him in regard to the mining situation he made the following statement:

"THERE is a greater interest in gold mining than has been manifested for many years. People are beginning to realize that only gold mining can produce incomes that are immune to all depressions. Big capital is available for exploration and development of everything that shows merit if the terms are attractive. California has ample resources in unmined gold to furnish employment for many miners and build flourishing business in the mining towns. There is more money in the ground that has ever been mined. Perhaps we must not rely so strongly, as we have, in selective mining, by Little Jack Horner methods, and encourage industrial production of the low grade ores that was left as waste, by the pioneers who searched for rich spots and shipping ores.

The cause of business failures, industrial stagnation, bank failures and unemployment can be traced back to the lack of money, flowing into the business stream. Business is like a mill wheel, it turns slowly as the stream dries up. During the war period, printing presses at Washington gushed a torrent of printed money into the business stream, at the rate of $65 per capita for four years. Today the new money gold coming into the business stream is but 50 cents per capita. The business incentive to gather 50 cents in new money is not so great as to gather $65. Business reflects the difference. Some one said "Money is the root of all evil," but it was later amended to read that "the love of money is the root of all evil" but the real facts as now developed show that it is "the LACK of money that is the root of all evil."

"It is the whole poisonous tree, root, stock and branch, of the present situation. The victims who LACK money, will writhe and squirm in its torture grasp. It drives business into sharp practice, questionable methods, false advertising swindling in quantities and qualities, and into dishonorable acts. Competition in business, has descended it rackets. It has become a 'battle of taws.' It is a struggle to get the other fellow's business and his money. It has driven men into unlawful occupations and into crime. It has made the gangsters, who are forced to 'get the other fellow's money' because more honorable means of getting money is not available. The more men and business that fail, the more there are who will resort to crime to get money.

Now is the time when the nation's unmined gold must be produced. Every mine that can be built to a productive possibility must be opened. Capital is as anxious to go to work as the unemployed worker. Both merely want their pay. Gold mining propositions, properly planned and budgeted for development with a management in which capital can have confidence, and get ample funds for development. The presentation of mere geological descriptions is not enough.

"We of the west have two duties to perform, first, to find emergency work for our unemployed and second, **to find opportunities for capital where two or more persons can be put to work with profit to those who would employ them.** If the second part of that duty can be accomplished the unemployment situation will take care of itself and business will become stabilized as well as employment.

"This county has many old mines that can be reopened profitably—and many, many good prospects that should be explored and would if they were presented in the right way.

"I don't know but what the churn drill, would explore some of these flat and inclined veins to considerable advantage, with very little expense. It might bring into operation several handsome producers.

"The gold mines are the country's way out of this hard times, and one thing I would urge, is that every man with a meritorious mine or prospect, go after capital at once."

20 STAMP MILL AT KELSEY MINE

Present 10-Stamp Mill Being Worked Two Shifts To Handle Ore

Work on the new 20-stamp mill being erected by the Kelsey Mining Company, at the Kelsey mine, near Placerville, is being rushed to completion to afford accommodation for handling the huge body of ore in the mine, according to M. Hayden, superintendent.

The present ten-stamp mill is being worked in two shifts in an effort to handle all of the ore taken from the mine, but much ore is accumulating in the stopes, Hayden said. The mine si being worked two shifts also, it is stated.

There are 1,250,000 tons of gold-bearing ore located above the main haulage tunnel, which is 900 feet below the surface of the mine, and this ore can be mined most economically and quickly, Hayden points out. Using a gravity system, mining upwards, the ore is allowed to fall into the stope, where it remains until it can be handled in the mill. The expense of hoists and other similar devices is eliminated under this system.

In his current report to the offices of the company in San Francisco, Hayden points out the advantage of the mine's location on the American river. An unlimited supply of water furnished by this stream makes it possible to operate the mill most economically, he explained.

EL DORADO COMPANY MINE ADDS STAMPS

An announcement received a few days ago from San Francisco states that operation at the Golden Horseshoe mine near Placerville, which consists of 450 acres, one mile and a half from Placerville, will be substantially increased this winter.

The company officers say the ten stamp mill and concentrating tables are handling between 40 and 50 tons of ore a day, averaging around $10 a ton. Ten more stamps ahve been hauled to the property, which will double the present capacity. These will be installed at once. At present a crew of 30 men is employed. As development and mill work progresses more men are to be added.

The property is opened by three tunnels, having a combined length of over 3500 feet. On the various levels, the officers say there is sufficient ore available to run the mill for several years.

Congressman Englebright Returns To Washington

AFTER a busy summer which included 11,000 miles of travel Congressman Englebright left Wednesday evening for his arduous duties in the 72nd Congress. He was accompanied by Mrs. Englebright and son, Jackson.

This session of Congress faces a problem unprecedented in the history of the United States. At the close of the last session of Congress it looked as if the House and Senate would split 50-50, Republican and Democrat, but the death of Speaker Nicholas Longworth wasa great blow to the Republican party, and more recently the death of three congressmen, whose places must be filled by special election, left the House 214 Republican against 217 Democrats with one member of the Farm Labor Party. The Republicans await the outcome of the special elections.

In the meantime the Republicans are looking carefully after the health of their members and telegraphed Congressman Englebright inquiring as to the state of his health.

The first duties of the new Congressman will be to elect a speaker. It is expected that a fierce battle will ensue, but it is not expected that the Democrats will be able to easily elect a speaker from their ranks, as the northern and southern Democrats will probably not agree upon a man.

In the meantime no business can be carried on until the speaker is elected.

The Senate is in a more fortunate position. While the Republican and Democrats are dead-locked in that body, the President pro tempore is a hold-over officer and it will not be necessary to elect one.

While Congressman Englebright will face a very difficult situation in this session of Congress he is determined to double his efforts in order to secure for his district that which he deems most necessary. He has earned the name of "raider of the treasury," because he has been able to secure larger appropriations for his district than any other congressman, that ever represented this district. At the last session of Congress his appropriations for the year 1931 alone, included:

Road Appropriations

For the construction of roads and highways in the National Forests, $1,200,000. This appropriation was for carrying on highway work such as the Yuba Pass highway which received an appropriation of $150,000 this year from the amount.

Prior to Congressman Englebright's election to Congress, work by the Federal Government on the Yuba Pass road from Downieville to Sierra City had been permanently discontinued and the project dropped from the active list. Upon his entry to Congress, he succeeded in overcoming the seemingly unsurmountably obstacles that had caused the government to drop the project and secured the agreement for building of the thirteen miles between Downieville and Sierra City. He has obtained from Congress over $450,000 in appropriations for for this work. Congressman Englebright has received many appreciations of his efforts in having brought about the construction of this most important develpment, and will remain as a monument to his work in behalf of Sierra County.

Federal Aid Highway Money for California

Federal aid money for state highway construction in past years has been made available during the month of December or January, with the result that contracts cannot be advertised or let until February or March. Due to the unemployment situation and in order that road work in California on the state highway projects receiving Federal aid might be continued through the winter months and thereby give work to many thousand men throughout California, Congressman Englebright requested the Secretary of Agriculture to make the Federal Roads Funds available this year in October. The Secretary complied with his wishes in this matter, and $4,121,000 was made available to the state of California as of October 15. This will enable our state highway commission to take care of many thousands of unemployed men throughout the state during the winter months and at a time when work is most needed.

Mining Appropriations

For the advancement of the Gold Mining Industry of California, Congressman Englebright obtained the following appropriations:

For investigations by the Geological Survey, Four Hundred Thousand Dollars ($400,000). Due to the great interest now being taken in gold mining, this appropriation and the work to be carried on by it is most important. The search for new profitable ore bodies or the extension of those already known can be more successful, when guided by the results of a thorough investigation of the mining districts made by trained geologists. These government geologists will review conditions in the older and newer mining developments, map the geology, veins and ore deposits, and prepare reports for publication. Such a thorough study of a mining district or large area, is usually not possible for an individual or company to carry out. Such examinations and reports are aiding greatly in interesting capital in mining developments.

For promoting mineral commerce, and the dissemination of information concerning the economic problems of the mining and mineral industry, three hundred and twenty two thousand dollars ($322,000).

For mineral mining investigations One Hundred and Sixty-five Thousand Dollars ($165.000.)

For fundamental reserach in geological science $100,000 to be used for investigating conditions under which ore deposits are found and the structural conditions that modify them.

For engraving and printing geologic, topographic maps, and reports of mining district, Three Hundred and Seventy Thousand ($370,000). This appropriation will make available the reports and investigations made during the past few years.

The Congressman also obtained many other appropriations for various federal activities in the district, some of which were:

Veterans' Hospital

For construction of Veterans' Hospital in northern California $900,000.

Public Building Allocation

For public buildings in various places in the District, $460.000.

Fire Prevention in National Forest

For fire prevention in national forest, $3,500,000.

National Parks

For the development and improvement of Yosemite and Lassen Volcanic National Parks, $1,365,000.

Reclamation Appropriations

For reclamation projects, $362,000

Topographic Survey Appropriations

For new topographic surveys and maps, $66,000.

Soil Erosion

For soil erosion experiment station, $50,000.

Bark Beetles Prevention

For the controlling of bark beetles that are killing large areas of pine trees on timber lands, $100,000.

Nevada City and County indeed can be proud of the man she has selected to represent her in Congress. In his visits to the various sections of his district this summer he was received with acclimation equal to the Governor and the press throughout the district carried glowing stories in his praise.

Mrs. Englebright, who accompanied him on most of his trips, is a favorite throughout the district and her welcome is no less than that of her distinguished husband.

TWIN QUARTZ MINE TO WORK CREW THIS WINTER

L. F. Lorenz, Los Angeles broker and mining man, passed through Nevada City several days ago enroute to the Twin Quartz Mine near Camptonville, which he owns.

He has formed a corporation, the Twin Quartz Mining Company, Ltd., and is going ahead with the property A crew has arrived from the south to work at the mine this winter. Plans are to drive the tunnel ahead and do considerable other development work. A mill will be put up in the spring and start crushing the ore which will be ready for it.

The ore taken out so far tests very good values it is stated.

Several thousand tons of good rock is ready for milling with much more in sight. The property promises to be a good producer.

LARGE CROWD ENJOYS THE SKI COURSE

A large crowd of motorists and snow sport lovers have enjoyed the last two Sundays at the Nevada City-Grass Valley Ski Course.

Both the professional and amateur jumps on the hill were put in first class shape last week. The snow was about 15 inches deep with a four inch icy crust. This made the sports far above any of the past occasions. The good paved highway and beautiful snowy setting added to the pleasure of the day.

YOU BET MINE CO. ADDS MORE MACHINERY

A consignment of mining equipment arrived in Colfax recently for the You Bet Mining Company. The machinery was unloaded and taken to the Rou Bet and Red Dog Mining district. Since the gravel mines in that section were closed down by the debris commission, which stopped the hydraulic process, very little has been done.

Charles Thompson, Los Angeles construction engineer and the promoter of the drag line and clam shell arrangement for the handling of the gravel, has followed the completion of litigation over the mining property by construction of bunk houses, cook houses and other buildings at the upper Red Dog diggings. The new machinery will be installed at this point also.

S. Simpson, resident manager for the Thompson interests and several of the Thompson sons will be interested in the mining machinery installation and operation.

During the fall approximately fifteen men have been employed by the company clearing out the old ditches in preparation for the winter's work. Under present plans a nine foot square tunnel is to be run into the bank and the gravel brought out by means of a drag line. At the mouth of the tunnel the gravel is to be handled by a clam shell distributing

(Continued on Page Six)

BLUE POINT GRAVEL MINE TO START HYDRAULICKING

About a year ago the old Blue Point Gravel Mine, which is north of Smartsville, was taken over by mining men and a crew of men has been engaged ever since getting the property in readiness for hydraulicking.

An old tailings dam at the mouth of the ravine below the claims is being rebuilt by Contractors Hemstreet and Bell of Marysville.

Two big tractors, gondola scrapers and other equipment are being used by the contractors, and half a dozen men are employed at the work. Between 10,000 and 12,000 cubic yards of earth will be moved from the floor of the ravine to fill the gap in the dam for the purpose of adding to the debris storage capacity of the reservoir that will be created.

The dam is about a mile north of Smartsville and about five miles up the Yuba river from the Parks Bar bridge.

Hydraulicking will be done on the old Blue Point gravel walls, which yielded rich returns in the old days. E. A. Hughes and E. H. Netter are in charge, and it is understood the necessary permits have been obtained from the California Debris Commission to reopen the mine.

Mr. and Mrs. E. W. Smith spent Thanksgiving Day in Folsom with their daughter, Mrs. Charles Hall, and family.

HOGE DEVELOPMENT CO. OPENS UP CROSS LEDGE

At the Hoge mine they have drifted about 300 feet onthe 450-foot level. They struck a cross ledge that parallels the contact. It is about a foot in width and assays run at $25 to the ton. They have cut through the foot ledge and are continuing to drift to the main vein which they expect to strike in about two weeks. This vein ranges from three to four feet in width and values run very high.

The shaft is now down to the 600-foot level and they are cutting the station. When the station is complete drifting will be started to the main vein that they are drifting to in the 300 and 450-foot levels.

The work is all in virgin country and is coming out as planned by the company.

As soon as the contract is completed, which will be about the first of the year, they will increase the force of men.

The mill will be installed early in the spring of ..932.

This is a large property comprising about 1200 acres. The ground that has been examined has proven of good value, but for the most part it is in a virgin territory and great promise is seen for this to make a large producer over a long period of years.

MINING PERSONALS

Fred Miller and V. and H. Johnson, who are mining at Relief Hill, were Nevada City visitors Saturday.

Mr. Jas. Grimes of Oakland, who is interested in the American Flag mine near Camptonville, spent Thanksgiving holiday with Mrs. M. M. Grimes and family.

Supt. James Bradley of the Spanish mine, near Washington, was in Nevada City Tuesday.

Three Months	.60
One Month	.25

Taken as a whole Nevada City enjoyed a very happy Thanksgiving Day. Maybe everyone did not eat turkey, but among our home people we know of no one who is suffering from a lack of a cheerful dinner.

Our merchants have nothing to complain of. Cash might not have been as plentiful as in past years, yet every merchant has done a very good business up to this time, and with the mining prospects in sight we feel we are going to have a very prosperous and merry Christmas.

Crowds enjoyed the ski course yesterday afternoon and taken as a whole Nevada City and community wore a smile of happiness on their faces.

The flurries of snow and rain made the day more truly a holiday than ever. As far as we know there were no accidents to mar the cheery day which added greatly to the happiness of the city and community.

JUDGE BYRON LYONS TAKEN BY DEATH

Judge Byron Lyons passed away Tuesday at the home of his cousin, Mrs. George Fortier, on Nevada street in Nevada City.

He was born in Rugley, Staffordshire, England, and was about 72 years of age. Mr. Lyons resided in Washington nearly 40 years, where he was engaged as a miner for most of that time. Several years ago he was elected justice of the peace of Washington township.

Judge Lyons was a devout Christian, possessed of all attributes that make a man a good citizen. He will be missed by his many friends, particularly in Washington. He served as a member of the school board there also.

Death was due to hardening of the arteries. He was ill only about a month and remained at the home of Mrs. Fortier till his passing.

He leaves to mourn his passing two brothers and a sister in England, his cousins, Mrs. George Fortier, Mrs. M. Hogan of Nevada City, and Mrs. T. H. Limmell of Oakland.

Judge Lyons was a member of Court Garfield, Foresters of America, for more than 30 years.

The funeral was held Thursday morning from St. Canice church, where Father O'Reilly celebrated high mass for the repose of his soul.

Holmes Funeral Home had charge of funeral arrangements.

MANY FIRES ARE OF INCENDIARY ORIGIN

According to a statement made by State Fire Warden William Sharpe Nevada County suffered 69 incendiary fires during the 1931 fire season, not taking into account fires within national forests.

All but three of the 133 fires are traceable directly or indirectly, to man, three having been caused by lightning. A total land area of 21,532 acres was burned over, doing large damage to timber, crops, meadows, and farm buildings.

During the season $10,000 in wages was spent for extra fire fighters. The direct loss is placed at $81,000.

Warden Sharpe and Deputy Warden George Howe literally lived in their clothes during the four fire months, having a scant few days at home minus fire calls.

The worden caused the arrest of a number of suspected incendiarists, four of whom were convicted and are now serving terms, either in jail or on probation.

Personal

Wm. Howlett of Lake City visited in Nevada City Monday.

Rev. Father O'Reilly celebrated a requiem mass for Mrs. Ida Sinnot of Downieville last Saturday.

Wm. Coughlan of Columbia Hill visited in Nevada City Tuesday.

Dr. R. E. Werner underwent a minor operation at the Woodland clinic recently.

Miss Mary Joan Campbell of North Columbia was a Nevada City visitor this week.

Mr. Arno and Clyde Browning were in town Monday from French Corral. Mr. Browning was injured at the Murchie mine and will be temporarily off duty for two weeks or more.

Mr. Horner Musfield and mother, from San Juan, were business visitors in Nevada City Monday.

The P. G. & E. are planning to move the large telephone pole at the corner of Broad and Pine streets to Union office, which will no doubt be done this week.

Rev. and Mrs. H. H. Buckner had as Thanksgiving Day guests in their home, Mr. and Mrs. Arnold Murchie, of Auburn, and Mrs. Ann Buckner and two sons of Berekley.

Marshall Gieselman, Mrs. Mary Hicks and Mrs. Martha Dillon are spending the holiday season in Oakland with relatives and friends.

Mrs. T. S. Ford and daughter, Miss Savory, spent Thanksgiving with Mr. and Mrs. B. Ford in Berkeley.

Dr. and Mrs. A. H. Tickell had as house guests, Mr. and Mrs. F. A. Burnham of San Francisco.

Among the out of town people attending the funeral of the late Frank Vaughn were Mr. and Mrs. L. P. Seibert of Sacramento, and Mr. and Mrs. Clyde M. Cole of Washington.

Mr. and Mrs. W. S. Coughlan had as Thursday visitors Mr. and Mrs. George Coughlan of Auburn.

Fred Searls and George Scarfe, mining engineers, returned to San Francisco after a few days spent here on business.

Mr. and Mrs. Harry Bolton had as Thanksgiving guests her parents, Mr and Mrs. Oliver and sister, Miss Oliver.

The home of Mr. and Mrs. William Tamblyn was the scene of a happy family gathering Thursday, when the following children came home for the holiday, Mr. and Mrs. Shattuck of Oakland; Dorothy Tamblyn of the College of the Pacific, Stockton; Ruth Tamblyn, State Teachers College at San Jose.

Dr. and Mrs. B. G. Cronwell entertained as their visitors over last week end Dr. and Mrs. Tom Fleming and son, Darrel, from Marysville.

Mr. and Mrs. Boosboom of Vallejo spent Thanksgiving with her sister, Mrs. Clara Jepson of Nevada City.

CIVIC IMPROVEMENT CLUB HOLDS INSTRUCTIVE MEETING

The Woman's Civic Improvement club held a most interesting meeting Monday evening at Miss Brand's Studio.

Miss Fisher, of the high school faculty, gave an interesting exhibition and explanation of color charts and a talk on "Art." She spoke of the ways it may be applied in adding to the home and also costumes of daily wear.

Mrs. A. E. Moutry, district motion picture chairman, sent a list of pictures, recommended by the October General Federation Preview.

Mrs. Gundrum, wife of Dr. Gundrum, and Mrs. Winifred Codman and mother drove up from Sacramento Monday to interview Congressman Englebright in behalf of the Indians. These women from Sacramento represented the D. A. R.

RANKS PARIS THIRD AS FASHION CENTER

ONA MUNSON is one movie star who does not feel she has to run to Paris twice a year in order to be well dressed. In fact she has joined the Buy At Home movement and really prefers American fashions. It has been said before that New York is ahead of Paris in styles. Miss Munson agrees with this and says too that Hollywood also outranks Paris. "The average woman in a Paris gown is not so well dressed as she is well costumed," Miss Munson says. Hollywood as a style center is to be spotlighted in an early episode of the Radio Newsreel of Hollywood, a weekly broadcast presenting the "behind-the-scenes" story of movie life. Miss Munson is to be featured in the broadcast.

Facts About the Telephone

St. Michaels is the only island in the Azorean Archipelago on which telephone service is maintained.

More than 240,000 stockholders of the American Telephone and Telegraph Company, or two-fifths of the total number, have owned their shares continuously for five years or more.

A new telephone cable is to be laid between Denmark and Sweden. It will be about 40 miles in length and will contain a special circuit for the transmission of radio broadcasting programs.

There was a gain of over 13,000 Bell telephones for the first six months of 1931 in the territory of the Chesapeake and Potomac Telephone Companies, which operate in Maryland, Virginia, West Virginia, and the District of Columbia.

What Is the Cause of Your Cough?

Many people do not realize that coughing is the effort to loosen phlegm from the infected spot in order that it may heal.

That is the function of Rexall Cherry Bark Cough Syrup. It loosens the hard dry phlegm—soothes the tickling and heals the inflamed tissues. In a very short while your cough has entirely disappeared. Get a bottle at the Rexall Store today. You will like its pleasant taste.

AMADOR IS IN THE MIDST OF BIG REVIVAL

Rich Ore Is Discovered At Depth In Famous Argonaut Property

Amador county, heart of the Mother Lode, is at present showing a great mining revival, especially in the opening up of new mining properties and the reopening of old properties. In nearly every part of the county the revival is being demonstrated and in many properties rich ore bodies are being unearthed and the industry is showing signs of great future promise.

Many mining men from different parts of the state are becoming interested in the county and in many instances are taking over claims which are proving highly profitable to the operators.

The world famous Argonaut and Kennedy mines of Jackson are boty operating full capacity and each property is showing promising indications.

Besides the two leading properties in this district a number of smaller mines are showing future promise of becoming great producers. One of the mining properties which is coming into prominence after an operation of three years is the Fern Mine located on the east vein of the Mother Lode on Murphy's Gulch. The mine is being operated by Los Angeles capital and the superintendent in charge is William Allured.

Recently a seam of good milling ore was found about 175 feet from the shaft and shows good indications The entire depth of the mine is 252 feet. The property is equipped with a generator, two electric pumps, ball mill, concentrating table and a gasoline hoist.

The Yellow Aster mine, which is located a short distance from the Fern Mine, is being operated by Geo. Chuma and Steve Sanguinetti and is showing promise of being ranked among the future producers. A number of smaller claims are being prospected in this section with good returns. Near Jackson is the Pathfinder Mine, located on the Courtright property.

The mine is being operated by Boston promoters and is known as the Russell Kent Mining Corporation Within a short time the shaft will have reached a depth of 300 feet, at which depth a station will be cut. Sinking operations have been under way for several months.

The Jackson Gate section is looming into prominence with the Raggio Brothers Mine, which is being operated at the present time by the Poulet Brothers. This is a famous bonanza gravel claim which in the early days produced thousands upon thousands of dollars.

The channel was struck recently and is showing signs of gold. The Poulet Brothers have been engaged in development work on the claim. There are a number of other mining properties near Jackson which will be opened in the near future. In some instances negotiations are unred way for reopening a number of claims.

Once again the Pine Grove and Volcano section, are showing a vast revival with several very rch prospects. Gus Boost of Jackson, who is engaged in development work on the Ruffino property, one mile from Pine Grove, is encouraged over the prospects. Boost, who has been working at the mine for two months, has found a 1½-foot ledge and states that indications look highly favorable as the ore discovered is good milling specimens. The mine has reached a depth of 100 feet.

One of the outstanding prospects from Pine Grove is the Blakely property which within the past month has created considerable excitement on account of the rich strike made by four men from Los Angeles who came upon an abandoned shaft and upon removing a bulkhead found a rich ledge which specimens have assayed as righ as $200 a ton. The ledge still continues andshows high grade ore.

Already the operators of the property have taken out several thousand dollars within a short time and have refused an offer for the mine.

In the Volcano section, the scene of past glories in the mining history of the country, is seen great promise for the future| The Jupiter gravel mine, which claim is being worked by Amador county promoters after a number of years of development activity, is starting to show promising indications of the channel. This claim, like many of the early days, was a rich producer. Then there is the famous Battle Mountain gravel claim which the Lagomarsino Brothers recently operated and from which rich specimens were displayed at hte state fair. For several months the brothers have been busily engaged in extracting high grade ore and recently unearthed ore which was valued at about $20,000. For many years this property was operated without success but during past nhmber of months has plaied this "ghost section of the sountry," in a listof altive mining. An agreement was recently signed between the Lagomarsino brothers and Ellsworth Wood, mining man, for the property. A number of smaller claims owned by Frank Devencenzi of Volcano were also acquired by Ellsworth Wood.

The Pioneer mine, located in this district is at present being operated by the Moar brothers. The mine has been nin operation for the past ten years and has a tunnel in 1,000 feet. The Moar brothers state that there is plenty of good milling ore at present and good future prospects.

Another tunnel property in the Pioneer district is the mine being run by Jack Howe, who has found good indications. The Carrie Mining company is operating the Carire mine which is looking very promising. The mill is running good ore and Manager Murlock is pleased with the pleasing prospects. The Kimball properties in the Pioneer section are benig operated as wil as many othrs. This district is looming into a very promising future.

The Central Eureka Mining company is operating the Old Eureka located near Sutter Creek with indications of better further conditions. There are a number of small prospects operating with success in this section and also around Amador City and Drytown.

The Plymouth district has a number of prospects among whicu is the property which is being operated by John Ratto and several others. In the majority of these claims in the Plymouth area development work is under way. Reporus are to the effect that indications are encouraging. At Plymouth development work is under way at the Plymouth Consolidated mine owned by the Argonaut Mining company.

Taking the mining situation as a whole throughout the county the industry has never looked as it does at the preesnt time. With the influx of outside capital and opening of claims long idle and the outlook of other claims hte coming months will see a new future for mining in Amador county.

Current rumor has it that shortly after the first of the year a number of the larger properties which have long been idle will reopen. The people of the present indications which will bring a bright future to this famous gold producing area of California.

MONTARA MINE INSTALLS FLOTATION PLANT

SANARA, Calif., Nov. 25.—A test conical mill and oil flotation plant, capable of reducing a ton and a half of ore an hour, has been built and placed in operation on the Montara mine, 24 miles east of Groveland by J. C. Mikesell of Los Angeles and associates, who acquired the property recently from Mrs. Annie P. Brnham of Big Oak Flat under a lease and bond. By cleaning out an old 300-foot drift tunnel, the crew employed has expoed in thes face two feet of ore averaging $47 a ton in gold, it is stated. The tunnel is being continued to determine the length of the ore hsoot.

Charles Gillis and B. E. and Wilbur Lilly of Sonora have become associated with H. L. Gorton, also of Sonora, in a lease and bond on the Good Friday property near Soulsbyville and its development has been resumed, after an idlenes of many years. Two feet of ore asaying $43 a ton in gold, it is aserted, has been revealed in the bottom of a 42-vertical shaft recently unwatered and repaired.

—0—

FRANKLIN HILL MINE TO WORK ALL WINTER

The Franklin Hill mine, owned, by Robert Hammer, on Franklin Ridge, six miles northeast of Cascade, will work all winter. Two men are employed running a tunnel to reach the channel.

George McMillen, owner of the Brown,s Hill mine and Sardine Gulch mines in the Brown's. Hill district, has run 330 feet of tunnel at the Brown's Hill property, five miles northeast of Cascade. It is estimated another 300 feet will cut the channel. Heavy snow has stopped winter work at the property, and McMillen expects to commence work the first of next May.

LICENSE PLATES WILL BE ACCEPTED DECEMBER 1ST

Application for 1932 license plates will be accepted by the Department of Motor Vehicles on and after December 1st if sent by mail.

This annuncement was made today by Russell Bevans, Registrar of the Department, who said his staff of workers was completing final plans for the renewal of more than 2,000,000 licenses during the next six weeks.

Although counter deliveries will not open at Sacramento or any of the branch offices of the department until December 15th, the motorist may save himself a special trip for plates by enclosing his fee and certificate of registration in an envelope and mailing them to Sacramento.

The applications thus received will be tabulated and plates prepared for mailing. Motorists will receive them shortly after Christmas as the department has an agreement with the postal authorities to withhold plates from the mails until after the holiday in order to avoid congestion.

Bevans ureges car owners of the state to avail themselves of this very simple method of obtaining plates by forwarding their applications at once

Here are some of the points the motor vehicle registrar urges you to remember in applying for plates by mail:

Be sure that your present address is the same as that shown on your white certificate. If you have moved mark out the old address and write in the new.

The new law requires that you give the serial number of your car and the number of cylinders. Write this information on your certificate when you mail it in.

Do not send currency for your fee. Send certified checks, bank drafts or mney orders.

The fee for registration is the same as last year, $3 for passenger cars and for commercial vehicles weighing less than 3,000 pounds. The fee for vechiles above this weight is based on the weight and number of wheels.

If you have completed the payments on your car during the year send your pink certificate properly signed by the person or firm from whom the car was purchased and $1 extra to complete the tranfer. In such a case the total fee for license and transfer would be $4.

GOLD MINING INCREASING IN OAK FLAT DISTRICT

JAMESTWN, Cal., Nov. 25.—As in other sections of Tuolumne County, gold mining is steadily increasing in the Big ak Flat district, and is beng attended by success. An ore body measurng 16 feet n wdth and averaging, it is asserted, $8 a ton n gold, has been opened up in the Quartz Gulch property, owned and being operated by James Burke of that town. The ore was first exposed at the end of a 170-foot crosscut tunnel, from which a raise has been exposed at the end of a 170-foot crosscut tunnel, from which a raise has been run in it to the surface, a distance of 70 feet.

The Slap Jack mine, three miles east of Big Oak Flat, has been taken over by Carl Bloomquist of San Francisco under a lease and bond from Frank Emerson of the same city and associates, and development work is again under way. A vertical shaft, now down 52 feet, is being continued to the 80-foot point, at which lateral operations will be started, it is stated.

Robert Milligan of Stoctkon is employing a crew of workmen ni the erection of a 20-ton daily capacity conical mill on his property, one mile east of Big Oak Flat. It will be used in the reduction of a six-foot body of milling grade ore being developed by a drift tunnel which has thus far been advanced 90 feet.

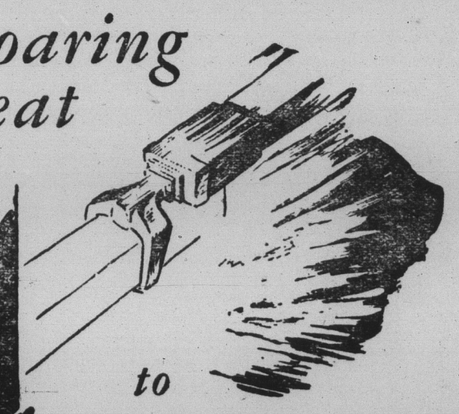
BUILDERS OF CALIFORNIA

from roaring heat to SKYSCRAPERS, BRIDGES, SHIPS



7 of the 12 largest STEEL COMPANIES operating in California are depositors in Bank of America

Mighty "rolls" await the glowing ingot. From their brute embrace will come steel — for skyscraper or bridge, ship or automobile, pipe-line or machine . . . The average yearly production of California's steel and allied manufacturers is valued at six hundred million dollars.

They employ one-fifth of the wage-earners in all California manufacturing establishments!

Steel companies operating branch plants or cooperating in construction projects, use the service of convenient Bank of America branches for payrolls and local purchases.

For national concerns, the Bank transfers funds to eastern cities over its transcontinental network of private wires. Interbranch remittances are speeded by daily use of air mail.

Bank of America's unique facilities thus permit better control of working capital, with increased interest earnings.

In many ways, this Bank has helped to create new markets for the California steel industry.

The same modern statewide service, made secure by the ample resources of Bank of America, is available to you at a nearby branch.

FOURTH HEALTH LECTURE DELIVERED BY CRONWELL

Article four of a series of health articles to be written each week by Dr. B. G. Cronwell, chiropractor and food scientist.

The increase of cancer all over the world the last twenty-five years seems to puzzle some of the would be scientists. First let us analyze a cancerous condition. The body is made up of billions of cells all working in unison for one purpose. To maintain life within the body. A cancer is any group of cells which cease to reinstate themselves. First one layer of cells die and slough off and then another and another which in a very short time takes on the appearance of a very bad sore, with no evidence of healing. The order from these dead cells is very offfensive and it is almost impossible to stay in the same room with a person having a bad cancer. Advanced cases of cancer and tuberculosis i always insist on taking care of in their own homes, because it is much more satisfactory to all concerned. Now let us get down to brass tacks as to what is the cause of so many cancerous conditions today. First, the place in or on the body where the cancer started had very poor blood circulation, for a long time previous to the appearance of the cancer. The poor circulation is caused by one of two things and sometimes both. The spinal nerve leading to this tissue is pinched where it emerges from the spine or the muscle tissue in the walls of the veins and arteries leading to the tissue effected, is in such a weak condition the blood is not propelled at the normal rate. I have proved to my own satisfaction that three-fourths of all cancers are caused by the perils of food deficiency. Let those last four words sink in a little and see if you do not think that is very liely kto be the one great cause. When a person first discovers they have a sore which will not heal, they begin to think about cancer. The more they worry the more they contract their muscles and the worse their condition becomes. Worry stops digestion of foods and means impoverished blood to build tissue. You are most interested in having this bad looking sore show signs of healing. You must first clean your body out side, then clean out inside, and keep clean. Put only clean fresh fruits, nuts, vegetables and lean fresh meats into your stomach. Use very little seasoning. Cancer patients are always salt fiends. They salt everything. Salt on apples, celery, mellons and other fruits. Remember salt is a preservative and keeps foods from decomposing or digesting. The process of digestion is to decompose and reduce your foods to a liquid and pass them through the elimentary tract as quickly as possible leaving their full chemical content in the system to stock the blood stream and nourish the tissues.

The next important point is to increase the action at the point of distress, by removing all nerve interference and obstructions to the normal flow of blood to and from the tissue. Do not fall for radium or Xray treatments for cancer. Some ten years ago there was a movement going on to have the United States government take over all of the radium deposits for the purpose of treating cancer. At that time Dr. T. F. Ratledge, President of the Ratledge system of Chiropratic schools sent an eight thousand word telegram to the President of the United Statse protesting against such a move, claiming it would put the government's stamp of approval on radium as a cancer cure and hundreds of innocent people suffering with cancer would be spending their last dollar with quacks and fakers advertising radium treatments. Four years later the government bave out a report that the use of radium had proved an absolute failure in the treatment of cancer. Since then there has been two more such reports and still you can pick up most any news paper and see Doctors advertising radium treatments for cancer. Here is another illusion I want to warn you against. Do not let anyone lead you to believe that any man is ever going to be able to take a piece of the flesh of any animal, rot and make pus of it and shoot that so-called serum into the live blood stream and that it will go to the chin and cure a sore there or to the ear on someone else and the leg of another person. It has never done ti and never will. Do not let anyone shoot anything into your blood stream. To me that is nothing more than blood assassination. Every time there is a smallpox epidemic there is always seventy-five per cent of all cases that were vacinated long before they took down sick. Smallpox is a filth disease..

Question: What is the cause of back ache in the small of the back? I wake up every morning with my back so sore I can hardly turn over in bed and after I am up a few hours it passes away. Mrs. C.

Mrs. C.: This is a question which would take a great deal of space if I were to give you all the reasons for such a condition. Most likely you have a very bad condition of the lower lumber vertabbre and your foods are too rich and heavy and over work your kidneys and irritate the bladder. A toxic condition of your blood gives you a ltitle rheumatic condition in the pelvic region.

Question: Can you tell me why my feet should swell. My feet are so swollen every morning I can not get my shoes on until afternoon. Do you think it is my kidneys? Mrs. T.

Mrs. T.: I usually find in such cases I have treated that the kidneys are not taking the excess amount of water out of the blood stream and sometimes it is because the circulation of the blood is so poor in the lower limbs that the blood is not carried back up and to the kidneys for the kidneys to do their work. A distorted lumber and pelvis region interfering with the sciatic nerve is like to b ethe primary cause.

Question: What can I do to keep from taking poison oak every time I go out in the country? Mr. T. F.

Mr. T. F.: A person who is affected by poison oak is not living on the right foods. You have hat we term a sour condition of the body tissues. Add more fresh fruits to your diet and avoid so much candy, ice cream and other sweets. Each time after returning from the country watch for the first sign of the itching, then bath the affected parts with plain cold water for five minutes, now take a good hand soap and lather for fifteen minutes. Keep the lather very thick like a man uses to shave. Now rinse good and dry by patting with a soft towel, do not rub. Repeat every four hours or any time the itching becomes annoying.

Question: What can I do to avoid putting on so much weight? I do not think you would consider me a heavy eater. I am now forty pounds over weight for my age. Mrs. M.

Mrs. M.: Your height is the only thing to gauge your weight by. If your ancestors were of the heavy type you are running true to form. Increase your exercise, have less sleep, watch your diet. Candies and sweets and many other rich highly seasoned foods will increase your weight very rapidly. Grapes, figs, dates, raisins and bananas are the fruits to be avoided in a reduction diet.

Do not hesitate to send in your questions. Be sure they reach me not later than Tuesday evening. Address me care of the Nugget offic or box 65 Nevada City.

GOOD ORE BODY OPENED BY SUPERIOR GOLD MINE

SAN ANDREAS, Cal., Nov. 25.—An orebody giving promie of developing such proportions as to justify the use of a power shovel in its mining is being opened up by the Superior Gold Mines, Ltd., headed by Albert Parrish of Los Angeles as president, at the Wirefield property, one mile south of Angels Camp, according to Manager Todd B. Elliott. The property, embracing 40 acres, was acquired about two months ago by the company under a lease and bond from F. C. Beedle of Reno, Nev., and assocates. Located on the Mother Lode vein system between the Utica and Carson Hill mines, world famous as gold producers, the Wirefield estate is virgin territory, practically no work having been done on it in the past. Three tunnels are at present being extended for exploratory purposes and in all results highly pleasing to the management are being obtained, it is asserted. One of the tunnels has exposed a width of 70 feet of ore assaying $4 a ton in gold, Manager Elliott states.

In association with New York mining men, Joseph E. King of San Andreas, veteran Mother Lode mine operator, has acquired under lease and bond from Mrs. Lulene Tilden of Stockton, the Pioneer Chief mine, two miles southwest of San Andreas. The property has a 530-foot incline shaft on a veni which varies in widtn from four to 12 feet in that working and drifts on the 450-foot level. In the latter the orebody shows a length of 133 feet with only one end defined. Samples taken from it have given average values of $10 a ton in gold, Mr. King states.

Development work on the Mountain King Mine, near Hodson, idle for many years, has been resumed by its owner, R. B. arks of Stockton. In cleaning out the Bulger 100-foot incline shaft on the property, miners have opened up a two-foot width of ore of excellent grade, ti is stated. When reconditioning of the shaft has been completed, it will be continued to greater depth.

Drifting operations on the 140-foot or bottom level of the Pine Nut mine, three miles north of Angels Camp, owned by R. E. Walsh of that town, are revealing a three-foot ore body yielding assays ranging from $7 to $13 a ton in gold, it is asserted. About si xtons of ore is being treated daily in the two-stamp mill on the property. Sinking operations are seen to be resumed in the shaft with an additional depth of 200 feet as the objective point.

FRENCH CORRAL

FRENCH CORRAL, Nov. 25.—My, but we are having a cold snap! Down to 20° the last two mornings. A disagreeable north wind Thursday and Friday made all complain.

Thanksgiving is near; perhaps we all have much more to be thankful for than w erealize.

C. Fertig and Joe Swazey of Nevada City were business visitors Tuesday.

Mrs. Webber, Mrs. Mary Mitchell, Mrs. L. Hardenbrook and Richard Hardenbrook of Grass Valley were Wednesday visitors.

Messrs. Rhodda and Knight of Placerville were Wednesday visitors and at this time closed a deal by which they purchased the Golden Fleece Mine. This property was owned by Thos. Myers and his siter, Mrs. M. Mitchell. For many years it was known as the old Harrison French Mine, having been the property of the late Harrison French a pioneer of French Corral. We learn that the new owners will begin mining operations at once.

Chas. Lutz of Oakland visited relatives in French Corral during the week.

Joe Keating, who has been workng here for several months returned to his home in Oakland Friday.

Mr. Gaunt, "the Raleigh Man" of Live Oak called on patrons Saturday

Mr. and Mrs. L. Dudley of Nevada City were week end visitors at the home of Mrs. Dudley's parents, Mr. and Mrs. W. E. Moulton, of this place.

Glenn Orr and Mr. Reed of Hood were Sunday visitors.

W. E. Moulton made a trip to San Francisco Sunday.

Rev. Fr. O'Reilly held services in Birchville Sunday. He was accompanied by Clement Organ and John Hieronimous of Nevada City.

K. Sullivan had business in Nevada City Saturday.

A. Browning returned to his home in French Corral Sunday. Mr. Browning is suffering from injuries caused by a fall, while working in the Murchie Mine.

NOTICE OF APPLICATION TO APPROPRIATE WATER APPLICATION 7031

Notice is hereby given, that South Yuba Company, Ltd., % C. H. Shaw, Hotel Whitcomb, San Francisco, California, has under the date of August 7, 1931, applied to the Division of Water Resources, Department of Public Works, State of California, for a permit to appropriate unappropriated water, subject to existing rights.

DESCRIPTION OF PROJECT

Water to be appropriated from South Yuba River, tributary to Yuba River, County of Nevada.

Amount applied for: 50 cubic feet per second.

Diversion season named: January 1st to December 31st of each season.

Water to be used for mining purposes.

Point of diversion within NW¼ of NE¼ of Sec. 8, T17N, R11E, M. D. B. & M.

Place of use described: Within Sections 6 & 7, T17N, R11E, & Sec. 12, T17N, R10E, M. D. B. & M. as shown on map filed with the Division of Water Resources.

Water will be returned to South Yuba River in NW¼ of NW¼ & NE¼ of NW¼ of Sec. 7 & SW¼ of Sec. 6, T.17N. R.11E., M.D.B. & M.

RELATIVE TO PROTESTS

Blanks upon which to submit protests will be supplied free upon request by the Division of Water Resources.

Any person desiring to protest against the granting of such permit shall within 60 days from date hereof, file with the Division of Water Resources, Sacramento, California, a written protest. Such protest shall clearly set forth the protestant's objections to the granting of the application and shall contain the following information:

(1) Statement of the injury which would result to protestant from such appropriation and use.

(2) The Area of protestant's water right.

(3) Protestant's past and present use of water both as to amount used and land irrigated, or use made of water if other than irrigation.

(4) The approximate location of such land or place of use and of the point of diversion of the water.

A copy of the protest should be sent to the applicant and this office notified that the same has been done.

Dated: Sacramento, California, October 28, 1931.

EDWARD HYATT,
State Engineer.

More Than Million in Twenty States Fed by Red Cross Volunteers

Hot School Lunches and Balanced Rations Given to Drought Victims—Seed Programs Instituted on Wide Scale

More than 1,000,000 persons in 862 drought-stricken counties of 20 States came under the care of the American Red Cross in what developed into the most extensive relief operations in half a century of ministering to stricken humanity.

Measures to lessen the severity of the blow inflicted by drought were taken as early as last September, when seed was distributed to more than 58,000 families for the planting of rye and other pastures, and to more than 27,000 families for the planting of kitchen gardens. The expenditure for this purpose amounted to $326,800. Green vegetables were made available up to the first of January.

Early in February another Red Cross garden program got under way and 507,000 packages of seed were distributed in 15 states. Quarter-acre plots were planted to beans, beets, cabbage, carrots, collard, sweet corn, kale, lettuce, mustard, okra, onions, peas, spinach, squash, tomatoes and turnips. Once again were farm families given the opportunity to participate in their own salvation.

A comparatively mild winter contributed to the success of the Spring and Fall seed campaigns. Many habitual single-croppers were introduced to the advantages of kitchen gardens, balanced cropping and balanced diet. Numerous land-owners have expressed the opinion that this constitutes the one apparent blessing to come out of the drought catastrophe. The United States Department of Agriculture and the local county agricultural agents and home demonstration agents cooperated in making this part of the relief operations outstandingly successful.

Balanced Meals Served

Red Cross feeding was aimed at adequacy and scientific correctness, as well as simple economy. In large numbers of schools, where children were found to be attending with little or nothing in their lunch boxes, hot meals were served at noon. A typical menu consisted of vegetable soup and bread one day; thick beef soup or stew with vegetables another day; cocoa or milk and cheese, peanut butter, or jam sandwiches, a third day.

In some places where lunches were not served in the schools, but were provided for in the regular food orders, each family having school children received extra staples for school lunches including peanut butter, raisins, prunes and tomatoes. Red Cross nutritionists instructed mothers in the preparation of lunches.

County health officers and private physicians commended the adequacy of rations procured on orders issued by Red Cross chapters, which were filled at local stores. Besides the usual staples, such as corn meal, flour, lard, meat, beans and potatoes, such items as canned salmon, cabbage, tomatoes, vegetables and milk were provided, each order being adapted to the special needs of the family for whom it was issued. Where pellagra threatened, eggs, yeast and other preventives were given.

Thousands of Volunteer Workers

Many thousands of volunteers, through their local Red Cross chapters, gave freely of their time, experience and efforts, as in other Red Cross disaster operations. They searched out needy cases in their communities, many persons being restrained from asking assistance because of pride. Chapter committees investigated circumstances, distributed food and clothing.

More than 500 carloads of foodstuffs were contributed. These were given free haulage by railroads. Farmers of more fortunate sections embraced the opportunity to help their pastoral cousins of the affected area. Shipments ranged from live poultry to fish, from grain to grapefruit. Carloads of flour, eggs, beans, vegetables, onions, rice, corn and mixed vegetables were included.

As the result of co-ordinated Red Cross chapter efficiency, not one authenticated case of starvation as a result of drought has been uncovered.

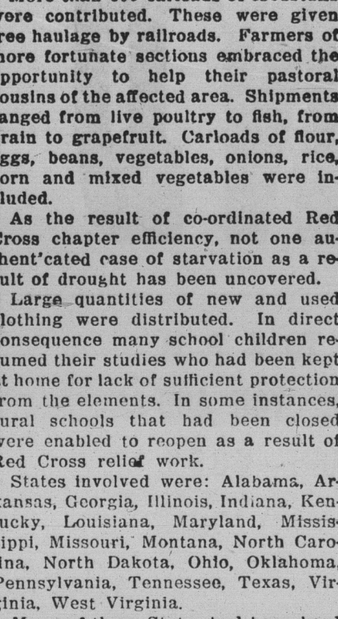
Large quantities of new and used clothing were distributed. In direct consequence many school children resumed their studies who had been kept at home for lack of sufficient protection from the elements. In some instances, rural schools that had been closed were enabled to reopen as a result of Red Cross relief work.

States involved were: Alabama, Arkansas, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Montana, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas, Virginia, West Virginia.

Many of these States had been hard hit by a succession of floods, crop failures, low prices and economic depression, and drought constituted a climax to the cycle of distress.

"Wherever I went," wrote one observer, "I made a point of asking what would have happened if the Red Cross had not been able to respond. In widely scattered points, from leading citizens, came the answer that undoubtedly there would have been many deaths directly from starvation, with epidemics preying upon the undernourished."

HOW HE KNEW



Hubby—There seem to be only female flies in this room.

Wife—Why, how do you know that?

Hubby—They're all on the mirror.

You and I

By CHARLES S. KINNISON

LITTLE SHOES

Guide her feet among the flowers,
Little Shoes, I ask of you.
Lead her on to happy hours,
As the world she journeys through;
Guide her little baby feet
Into girlhood, pure and sweet.

When there's right and wrong to choose,
And there's danger stalking near,
Lead her safely, Little Shoes,
Into pathways clean and clear.
Little Shoes, I wish that I
Might, as you, be always nigh.

Old and battered Little Shoes,
You've a task that's mighty sweet.
If one task were mine to choose,
Mine would be to guide her feet.
May my own steps lead her on
To Godly paths and halcyon.

Find Structure Erected by Babylonian Monarch

A temple built by Nebuchadnezzar in approximately 600 B. C. has been discovered in Ur of the Chaldees by excavation of what appeared to be an insignificant mound. C. Leonard Woolley, director of the joint archeological expedition maintained at Ur by the University of Pennsylvania and the British museum, reported that the temple is in the best state of presevation of any ever found in Mesopotamia. The structure, which was added to and restored by Nabonidus, 50 years after it was built, lies in the inner corner of the northern harbor at Ur and was concealed by a mound whose excavation the expedition undertook "for topographical reasons." "What makes the building in every way remarkable is its condition," Woolley declared. "The walls stand without exception to a height of nearly 20 feet and even the whitewash on them remains in good condition. In all Iraq there is no other temple so well preserved. We have not attempted to clear the outside of the temple, but once inside one obtains an astonishing effect of completeness. This is the only place in Iraq where one can stand in a Babylonian temple and forget for a moment that it is a ruin."

Economical, Delicious Desserts Of Dried Fruits and Tapioca

TODAY economy is the watchword, yet withal, families must have nourishing and tasty desserts to crown the meal.

Dried fruits—figs, raisins, apricots, dates and prunes—can be made into a wealth of delicious desserts at small cost. They are Nature's own sweets packed with sugar for cold weather energy and they make desserts pleasing to the sweet tooth of the whole family—young and old.

Apricot Tapioca

¾ pound dried apricots
3 cups water
½ cup sugar
3 tablespoons quick cooking Tapioca
⅛ teaspoon salt

Wash apricots. Soak in 3 cups water 1 hour and cook until tender. Drain. To juice, add enough water to make 2 cups liquid. Add Tapioca and salt, and cook in double boiler 15 minutes, or until Tapioca is clear, stirring frequently. Add sugar. Cool. Force apricots through sieve. Fold pulp (about 1 cup) into tapioca mixture. Chill and serve with whipped cream. Serves 6.

Norwegian Prune Tapioca

4 tablespoons quick cooking Tapioca
⅛ teaspoon salt
1 teaspoon cinnamon, or 1-inch stick cinnamon
1 cup cooked prunes, seeded and finely cut
4 tablespoons sugar
1 tablespoon lemon juice
2 cups unsweetened prune juice, or juice and water

Add Tapioca, salt and cinnamon to prune juice, and cook in double boiler 15 minutes, or until tapioca is clear, stirring frequently. Remove cinnamon (if stick is used), add sugar, lemon juice, and prunes. Chill. Serve with cream. Serves 6.

Fig Tapioca

3 tablespoons quick cooking Tapioca
⅛ teaspoon salt
1 teaspoon butter
3 cups hot water
½ pound figs, finely cut
1 cup sugar
½ teaspoon vanilla
1 tablespoon lemon juice
Grated rind ½ lemon

Add Tapioca, salt, and butter to 2 cups water, cook in double boiler 15 minutes, or until tapioca is clear, stirring frequently. Cook figs with sugar and 1 cup water 20 minutes, or until smooth and thickened. Add to tapioca mixture. Add vanilla, lemon juice, and rind. Serve cold with whipped cream. Serves 6.

During the Holiday Season
Instant Hot Water is a time saver!

DURING the holiday season you need plenty of *instant* hot water. You save time in starting the cooking. You eliminate 60% of the work of disnwashing.

The proper way to wash dishes is to use plenty of soap in 120 degree water, followed by immersion in water of 180 degrees for a minute and air drying.

Instant hot water helps in *all* your household tasks. It is easier to keep things clean.

The Automatic Gas Water Heater requires no watching. It heats the water, stores it, and shuts itself off. The boiler is insulated. That is why no gas is wasted keeping the water hot. All you do for a basinful or a tubful of hot water is to turn a faucet anytime of the day or night.

As for cost, automatic hot water costs less per gallon than any other method of heating water in the home.

Come into our office and see the Automatic Gas Water Heaters. You can have one installed for a small sum, the balance to be paid in monthly installments.

WM. P. MILLER AT LIFE'S END

Wm. P. Miller ,one of the old resident of Nevada City and county, passed away Monday evening at the home of his daughter, Mrs. C. H. Becker of Marysville. He has resided with his daughter since the death of his wife in this city two years ago.

Mr. Miller was born in Kentucky 80 years ago, coming to California in early manhood. He married his late wife in Smartsville. They celebrated their golden wedding anniversary several years ago. Ten children were born to this union. The following survive: Mrs. C. H. Becker of Marysville, Mrs. E. G. Meadows of Glendale; Mrs. Thomas Eddy, Mrs. Cora Hunt, Russell Miller of Grass Valley; and W. J. Miller of Sacramento. There are 13 grandchildren, and five great grandchildren. George Miller of Grass Valley is the only brother.

Shortly after this marriage they moved to Montezuma Hill where they lived nearly a half century and raised their family. On account of advanced age Mr. and Mrs. Miller moved to Nevada City where they lived until her death.

Mr. Miller was an expert hunter and sportsman.

He served in the army under General Custer as a trooper.

The funeral service was held in Marysville Wednesday morning with interment in the North San Juan cemetery beside his wife.

PORPHYRY CLAIMS NEAR OLD SHASTA WORKING

Oakland investors recently bonded Moore's Condenser, Porcupine and another claim or two on a 10 per cent royalty basis. The property is situated a half mile from the old Shasta Mine, west of Shasta, in Shasta county.

Five houses have been erected for the accommodation of the working crew of eight men.

It is proposed to put up a rock crusher and a mill, the latter to have a capacity of 400 tons a day. There is a great ore body of porphyry carrying gold in values that will warrant mining and milling on an extensive scale. The ore is low grade, but there is a vast amount of it and the cost of mining and milling it is believed, will be small as compared with the values that can be recovered.

MASONIC MEETING ATTRACTS MANY HERE

A large gathering of Masons met Saturday in two meetings. The first one began at five o'clock and ended at 6:30. Those present went to the National Hotel where they were served a splendid turkey dinner by Manager Fred C. Worth.

The second meeting was after the dinner. Fred C. Joubert of Camptonville, inspector of the 14th District, and Thomas Harris of Grass Valley, inspector of the 12th District were present. The third degree of Masonry was conferred on two candidates.

Masons of Grass Valley, Camptonville, Georgetown, Truckee, Nevada City and far distant points, were present at the meeting which was the largest gathering of Masons to meet in this city in a long time.

SCHOOL LIBRARY WAS DEDICATED MONDAY

A large and enthusiastic crowd of parents of the children and patrons of the school met at the grammar school Monday evening to witness the dedication of the school library. It was under the auspices of the P.-T. A. with Miss Doris Nightengale in charge of the program.

They first gathered in the library to inspect it, later going to the assembly hall where four selections were rendered by the school orchestra.

Refreshments were served at completion of the exercises.

A number of recent donations have added greatly to the fine collection they now possess.

YOU BET MINING CO ADDS MORE MACHINERY

(Continued From Page One)

the gravel to a system of sluice boxes. Only gravel from the bed rock is to be worked, this gravel running as high as ten dollars per yard.

In the last few days several cars and trucks have passed through Nevada City en route to the You Bet mine.

Mr. Thompson has had the dragline and clam shell digger at the property for some time experimenting with it. The new method has proved satisfactory so far.

Very little water is required to handle the gold bearing gravel. The method is being watched with great interest and will be practiced in many places in this section where hydraulicking has been suspended in early days, if it holds up to expectations.

MR. AND MRS. TREGLOWN CELEBRATE ANNIVERSARY

Mr. and Mrs. Wm. J. Treglow celebrated their 25th or silver wedding anniversary with a reception for their friends, both afternoon and evening.

Numerous friends who were at the ceremony 25 years ago were also present to extend congratulations.

Out of town relatives present for the occasion were Mrs. Sophie Nickerson, an aunt of Mrs. Treglow, and Mr. and Mrs. Merritt Nickerson, all of Sacramento.

UNION THANKSGIVING SERVICE WAS HELD

A union Thanksgiving Service was held Thursday morning at 10:30 o'clock in the Mehtodist church at which the members of Trinity Episcopal church and the Methodist church united in religious observance of the day.

Members of both church choirs sang accompanied by the orchestra and there were special orchestra numbers.

Mrs. Lydia Talbot sang a solo preceeding the sermon by Rev. Chas. Washburn.

A good crowd was in attendance and enjoyed the splendid services.

Mrs. K. M. Sullivan of French Corral was a business visitor in Nevada City, Monday.

C. Fertig and Joe Swazey of Nevada City were business visitors Tuesday.

WILL BE OPEN FRIDAY EVENING FROM 6 TO 8 P. M. SANTA CLAUS WILL BE THERE TO GREET YOU AND GIVE YOU A BEAUTIFUL CHRISTMAS STORY BOOK. DON'T FORGET THE TIME AS SANTA HAS MANY OTHER STOPS TO MAKE BEFORE CHRISTMAS

ERWIN GRAVEL MINE HAS CREW WORKING

The owners of the old Erwin Gravel Mine near Downieville are reopening the property with a crew of 14 men.

This is a good gravel property with a past production record.

The mine is on the famous Eureka channel which has borne such rich returns in the past.

Runs errands... saves time.... the Farmer's Telephone

THE TELEPHONE often saves valuable time when help is needed on the farm. It safeguards life and property in case of burglary, fire, injury, or sickness. It pays for itself many times over by running needed errands to town, bringing a spare part when some machine is broken, or in finding where and when to sell for the best price.

The modern farm home has a telephone.
